PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of experience supporting production cloud and server infrastructure across AWS, Azure, and VPS environments. Hands-on with AWS, Terraform, Kubernetes, Docker, CI/CD, Linux, networking, IAM, reverse proxies, monitoring, and production troubleshooting. Owned delivery and day-to-day operations for 15+ production platforms spanning blockchain, gaming, RWA/IDO, and backend services, with a focus on reliable deployments, secure access, automation, and incident resolution.

PROFESSIONAL EXPERIENCE

ShamlaTech Solutions | Coimbatore, India

DevOps Engineer | Aug 2023 - Jun 2026

- Owned production infrastructure and deployment operations for 15+ platforms spanning blockchain exchanges, gaming, RWA/IDO, and backend services.
- Designed multi-server network topologies with private segmentation, private IP addressing, hostname-based service discovery, and UFW rules restricting inter-service traffic to approved CIDR ranges.
- Built and maintained CI/CD pipelines using GitHub Actions and GitLab CI/CD for production deployments, automating build, test, and deployment workflows.
- Containerized multi-service applications with Docker and Docker Compose and supported Kubernetes-based workloads, improving deployment consistency across environments.
- Migrated production backends from a hosting control panel to Nginx/Apache with Cloudflare Origin certificates for TLS termination and edge routing; served Unity WebGL workloads from EC2.
- Debugged and hardened Azure Terraform deployments by replacing hardcoded subnet references with module outputs, removing plaintext admin credentials from tracked configuration, attaching NSGs to VM NICs, and updating legacy VM resources.
- Diagnosed a real-time WebGL backend issue involving WebSocket statelessness and cold-start latency, then migrated the workload from Lambda/API Gateway to EC2 while retaining RDS PostgreSQL and S3 within a VPC.
- Operated Bitcoin and Dogecoin full nodes with pruning, indexing, localhost-only RPC and wallet management; integrated Ethereum/TON via external RPC and administered MongoDB/PostgreSQL with automated Docker/mongodump backups.

SMIK Systems Pvt Ltd | Coimbatore, India

DevOps Engineer | Mar 2022 - Jun 2023

- Designed and configured Jenkins CI/CD jobs to automate build, test, and deployment workflows across release cycles.
- Provisioned and supported application infrastructure across AWS and Azure, including EC2, VPC, Security Groups, and Lightsail.
- Built Bash automation for scheduled backups, service restarts, and cron-driven maintenance, reducing manual operational effort.
- Worked with development and QA teams to troubleshoot deployment and integration issues and support reliable releases.

Security Incident Response Automation (Personal Project): Built a containerized incident-response pipeline using Wazuh, Fail2Ban, Prometheus, Alertmanager and Python remediation, with Grafana dashboards and Telegram alerts on AWS EC2.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, VPC, RDS, IAM, Security Groups, CloudWatch, Lambda, API Gateway, Lightsail), Azure, VPS/Contabo

IaC, Containers & CI/CD: Terraform, Serverless Framework, Docker, Docker Compose, Kubernetes, GitHub Actions, GitLab CI/CD, Jenkins, Git

Networking, Monitoring & Security: Private network segmentation, UFW, CIDR access control, DNS, SSL/TLS, Cloudflare, Nginx, Apache, Prometheus, Grafana, Wazuh, Fail2Ban, incident response

Systems, Databases & Blockchain: Linux (Ubuntu, Debian, CentOS), Windows, Bash, Shell scripting, Python, Cron, PM2, MongoDB, PostgreSQL, MySQL, Bitcoin, Dogecoin, Ethereum, TON, RPC integration, transaction monitoring

EDUCATION & CERTIFICATION

B.E. Computer Science - Park College of Engineering and Technology | Apr 2021 | CGPA: 7.10

AWS & DevOps Certification - Yuva Sakthi Academy
